<sup>1</sup> See www.shiprush.com for list of supported accounting applications and versions.

<sup>2</sup> See www.shiprush.com for list of supported CRM applications and versions.

<sup>3</sup> ShipRush for ADO requires that you have a developer who can write the needed SELECT/UPDATE SQL statements. For one-at-a-time shipments (not batch shipping)

<sup>4</sup> ShipRush adds support for new ecommerce systems several times a year. Visit <http://fedex.shiprush.com> to see the full list.

<sup>5</sup> ShipRush UPS Basic allows shipments to be originated in over 23 countries served by UPS. Please see the ShipRush Basic Edition documentation for a full list of supported origination countries.

Compatible with applications running on Linux (including Java & PHP apps)					Yes	Server may be any OS Shipping station must be Windows

<sup>8</sup> See product documentation for list of available return service options.

<sup>9</sup> Pick-n-Pack is a workflow whereby the shipping label is generated before the parcel weight is known. The workflow is: Print pick list & shipping label. Pick the shipment. Pack items in the box. Apply label to box. Scale the box. Update the shipping system with the parcel weight and (optionally) dimensions.

	<b>ShipRush for FedEx shippers</b>	<b>ShipRush for UPS Basic Edition</b>	<b>ShipRush for UPS Pro Edition</b>	<b>ShipRush USPS &amp; ShipRush for Stamps.com</b>	<b>ShipRush SDK</b>	<b>ShipRush Browser Plugin</b>
